

Kimberly Page, M.D., F.A.C.S.

Dr. Kimberly Page is a board certified Neurosurgeon who completed her residency training in Neurosurgery at Stanford University in 1995. Prior to medical school she received both her bachelor's and master's degrees in Biology at the University of Nevada in Reno. She also completed fellowship training in Epilepsy and Functional neurosurgery. She has been in solo practice in Redding since January of 1996, has been active in community education at the elementary school level teaching young children about brain and spinal cord injury prevention. This program is called 'Think First for Kids' and is sponsored by Dr. Page locally and the American Association of Neurological Surgeons nationally. She has held positions of committee member representing north state surgeons for the American College of Surgeons, is currently President of Women in Neurosurgery and on the board of California Association of Neurological Surgeons. Dr Page is also a member of many societies, including the Congress of Neurological Surgeons, American Association of Neurological Surgeons and American Epilepsy Society. She has held the medical directorship of Neurosurgery at Mercy Medical Center Redding for ten years, but practices at both SRMC and MMC. She is a native Californian and loves living and raising her family in the North State.
